

HOME OWNERSHIP

--And now is the time to build in Edmonton

THE road to permanent happiness and real prosperity is the way of thrift. The solid happiness that is of the home is only in the home that is owned; for there is no security in the house that is merely rented.

What a sense of well-being and what real contentment is in home ownership. You have perhaps dreamed for years of having that house—with everything arranged just as you want it—with your garden and the rooms laid out as you have planned. And you do not have any place for landlords in that dream plan, for you know that home ownership is real thrift.

Sometimes when you look at your sheaf of rent receipts you realize just what it means to own your own

home and pay this rent money to yourself. And the sooner you begin building your own home, the sooner you will quit paying rent.

Now is the time to start—this year, while building materials and labor are lower than they will be in the future. Remember that rents, as well as materials will grow constantly higher in the Edmonton district. There is no time like the present to begin.

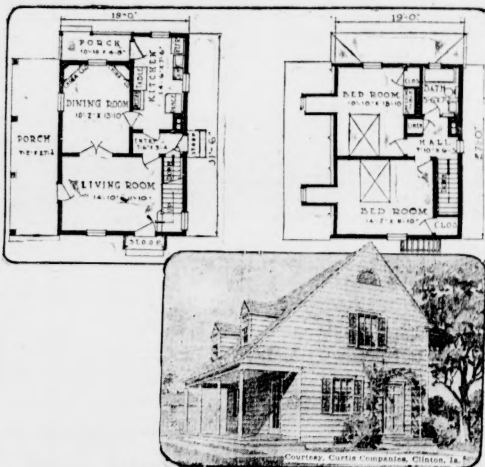

And it is not so hard to begin. There are many reputable firms that will help you with the details of financing, etc. And the concerns on this page will give you every assistance in the way of advice and service in their special lines.

Own your home

Consult these firms at any time
They are anxious to serve you.

Full Value of Hominess for Every Dollar Here

Wherever side of this little house faces the street, it makes a pleasing frontage. If you are looking for a five-room plan for a narrow lot, you will like this sturdy and a-half Colonial. The house is 20 feet wide, and the porch is 2 feet 2 inches more. As you enter the arched doorway into the living room, the open stair is just to the right. The basement stair is arranged just below it, true economizing space. From the living room you may pass to the kitchen, an that many steps are saved during the day. A glass door leads from the living room to the living porch. The dining room is connected with the living room by French doors, and through them

there is a pretty view of a pair of corner china closets. These of course should be counted in clear view and it is of advantage to know that one may buy really good built-in furniture of this kind, ready to install at moderate prices. The kitchen has the long, narrow shape preferred by many housewives, and has plenty of wall space for all the cupboards and working space needed. The back porch may be screened off a supplementary workroom. With outside openings on three sides, the kitchen ought never to be uncomfortable. Two bedrooms are on the second floor. The little dormer, which is an attractive part of the exterior, affords cross-ventilation in these

sleeping rooms. One of the rooms has a built-in dressing table that to the last word in dairy convenience. Opening off the hall is a linen closet, with drawers, shelves and sliding trays, all enclosed by a regular interior door. Here is a house that returns full value of hominess for every dollar of its moderate cost, which should be about \$6000.

PLANS SUPPLIED
Detailed plans and specifications of this house may be obtained at low cost by writing to the House Plan Editor of The Edmonton Bulletin.

Keep Oil Profits Here

Millions now going abroad can be retained in Alberta

CONSIDER carefully these facts, and you will realize that with Alberta on the eve of great petroleum development—geologists freely predicting that it will be the richest oil field in the world—the money now being sent abroad for gasoline and petroleum products can be retained here in Canada—the most of it in Alberta, and that the big profits will be secured by the refining and distributing end of the business.

First realize that with Canada paying more than \$120,000,000 a year for gasoline and petroleum products, this sum is absolutely lost to the country—the most of it going to United States.

Then remember that Alberta alone will soon be able to supply all of this home consumption and that it will be refined here.

RECOLLECT that when the Standard Oil Trust was dissolved, it developed from the evidence at that time, that the great profits accrued from the refining and distributing end of the business.

Then you must reach the inevitable conclusion that the business of refining and distributing of the present and potential output of Alberta oil fields must offer an unusual investment opportunity.

Refineries Distributors Limited offers such an opportunity. The Company, organized to market the "Pep" petroleum products of Alberta Refineries Limited, has enlarged its original function and will build and operate a "Cracking Plant" which, by a new scientific process, will extract from the crude oil of the Wainwright field, from 50 to 70 per cent. anti-knock gasoline—a superior product.

THE Company will also build and operate Service Stations for the distribution of "Pep" gasoline and oil products, enlarging the scope of this department as production is increased.

A study of the figures and facts given on this page will show you that with the units even now in operation and immediately projected, working at full capacity there will be an earning of 41 per cent. on the full capitalization of the Company.

Remember that the present offering is but the balance of a block of 30,000 Preference Shares, and that with this allotment a share of Common Stock is given as a bonus with every Preference Share.

If there is anything about this offer which you do not quite understand, phone, write, or send for a representative to call upon you. This involves you in no obligation.

The shares are being rapidly taken up. It will be greatly to your advantage to look well into this investment opportunity now

Cracking Plant For Treating Alberta Crude

Prof. Gustav Egloff of the University of Alberta, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Plant" in the production of high grade anti-knock Gasoline from crude oil.

He claimed, and showed by tests and actual production in many fields, that by the Dubbs process, from 50 to 70 per cent gasoline is extracted from the crude and showed that from the Kevin Smith oil crude this percentage is always obtainable. The heavier crude from the Smack-over field is mentioned as showing "the wonderful possibilities of this process."

"One of the wonder oil fields of the United States is the Smack-over Arkansas, which is still producing 180,000 barrels per day, of which 160,000 barrels (December 31, 1925), is heavy oil. This oil, of asphaltic character, is not very satisfactory as a fuel oil due to its emulsified water, high sulphur contents and other properties.

"The general inquiry when a new Smack-over well was brought in 'What will they do with it after they get it?'

"One leading oil man stated that Smack-over 'Heavy' crude' had everything in it it should not have for a refiner.' Yet, despite these pessimistic statements, Smack-over heavy oil is being commercially cracked into over 50% gasoline. Smack-over heavy crude oil production of 180,000 barrels daily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved presage those which will be accomplished by the Cracking Plant in treating the crude oil from the Wainwright field, as the chemical composition and gravity of the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants are in operation or under course of construction in various parts of the world, such as Japan, Borneo, Java, and Dutch West Indies, Australia, Rumania, and many parts of the United States."

Refineries Distributors Limited

208 McLEOD BUILDING, EDMONTON, ALBERTA

Capitalization ~ \$1,000,000

90,000 Shares, Preferred, \$10 Par

100,000 " Common, \$1 "

Present Offering: The balance of a Block of 30,000 Preferred Shares at Par each Preferred Share carrying a Bonus of One Common Share.

DIRECTORS:

JOHN L. MERCER, Edmonton, Alberta, President.

H. A. STEWART, Vancouver B.C., Vice-President and Managing Director.
M. C. HAMMOND, Edmonton, Alberta.

J. C. C. BRENNER, Clover Bar, Alberta.

ROBERT McDONALD, Edmonton, Alberta.

W. A. TRIMBLE, Edmonton, Alberta, Secretary-Treasurer.

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each, and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 3 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 8c per gallon clear of

freight being available from this source alone at the present market prices.

Also to erect a "Cracking Plant" at a cost of \$150,000. This will have a capacity of 1,000 bbls. of crude oil and will produce from this a minimum of 500 bbls. of anti-knock gasoline every twenty-four hours. At 35 gallons to the barrel, this shows a total output of 17,500 gallons a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$25.00 per day net. This alone will show a handsome dividend on a \$1,000,000.00 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentiality for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the earnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry based directly upon natural resources, reap the rich reward.

Marketing Company Has Contract with Refinery

Refineries Distributors Ltd., the marketing company, have a contract from the refining company which guarantees the marketing company 5c per gallon clear of freight delivered at distributing points throughout the country. That is 5c under tank wagon prices at these points. We pay our agents a 1% commission and estimate a further 1% for office and overhead—leaving 3c per gallon clear profit to the marketing company.

As an example of the revenue to be derived from this source, figuring on the basis of 1000 barrels per day throughout, half of which would be fuel oil, leaving 500 barrels per day for distribution by the marketing company, 500x35 equals 17,500 gals x 3c per gal. equals \$525.00 per day net profit or \$164,250.00 net profit per year. This amount of oil can be distributed by ten bulk stations, and already we have more than this number established at a cost of \$100,000.

We have had to refuse many orders for products from other points, thus the need for expansion. In addition to this source of revenue the marketing company will build a cracking plant that will give us an additional 17,500 gals per day of straight gasoline, using Wainwright crude.

The Company is fortunate in having secured as General Superintendent of the plant, Mr. M. L. Berryman, formerly Chief Chemist and General Superintendent of some of the principal plants in the South such as the Gulf Refining Co., The Texas Company, Mexican Petroleum Co., and others. He was one of the first men in charge of a Cracking Plant using the Dubbs Process and his experience has been such that he will be able to operate the refining and cracking plants economically to the very best advantage. He is a highly capable executive. He is most optimistic regarding the present project.

Information Coupon

TO THE REFINERIES DISTRIBUTORS LIMITED,
208 McLeod Building, Edmonton, Alberta.

Please furnish me with complete information regarding "Refineries Distributors Limited." It is understood that there is no obligation implied.

Name

Address

"PEP" is the appropriate name given to the gasoline product of Alberta Refineries Limited, produced from the crude oil of the Wainwright field.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.
